SIGNET® CLEANING CHEMICAL SERVICE

With a simplified cleaning chemical program,
you're always Ready™ for business.

Welcome to cleaning chemicals made easy

Here's how our service works:

1. We'll visit your facility and get an in-depth look at your cleaning habits and needs.
2. We'll offer you the tools to develop a customized cleaning chemical program that addresses each zone of your facility.
3. Our patented dispenser will be professionally installed at your facility.
4. During each service visit, we'll replenish all chemical reservoirs and ensure your dispenser is functioning properly.
5. We'll periodically check in to make sure you're completely satisfied. Along the way, you can always call our technical support line at 877.448.5770 if you ever have questions or requests.

Save time, money and space

You'll no longer have to spend hours shopping, managing inventory, placing orders and manually mixing chemicals. Plus, because our patented system dispenses the perfect amount of properly diluted chemical, you'll save money and get a better clean by not overusing product. And you'll save space too, since you won't be storing bulky products on site.

Rest assured with our trusted service

You can relax knowing that Cintas is taking care of all your cleaning chemical needs. Our regular service visits give you peace of mind that all of your dispensing equipment is functioning properly, and that you'll always have product on hand without having to stock up on inventory or make emergency trips to the store.

Never compromise on cleaning performance

You can be confident that Diversey's industry-leading floor, hard surface and manual warewashing cleaners are the most effective cleaning products. All of their proven performers meet a wide range of specific cleaning needs, and all are available at the simple touch of a button without the need for manual dilution or pouring.

Ensure sustainability and help keep employees safe

Diversey's cleaning chemicals meet Green Seal® certification requirements, and an easy-to-use dispensing system reduces solid waste like packaging and plastic bottles. Plus, the pre-mixed formulas save your employees and customers from being exposed to concentrated chemicals, or encountering spills and waste resulting from incorrectly using products.
